1.2   Overview of EASY CONTROL

21425 / 0

1.   Navigation unit
2.   Display

1.2.1 Navigation

21265 / 0
Start / Stop

Change the parameters of the device function.

Acknowledge selection.

2   Setup Manager

In SETUP MANAGER, operating states can be called up and pre-settings entered.

2.1   General notes

| i | NOTE:
Pre-setting mode can only be called up when tanning is not taking place.
30 seconds after the last button was pressed, the device changes automatically into standby mode. |

2.1.1   Open the SETUP MANAGER (pre-setting mode)

− To open the SETUP MANAGER press the ⚫ button for approx. 3 seconds.

In the delivery state, you can access the pre-settings using the master code.

− Enter the master code (default setting 1000).

21265 / 0
⏻   Start / Stop

➖ ➕   Change the parameters of the device function.

Acknowledge selection.

2.1.2   Master code

The master code allows you to access all of the pre-settings.

If you know the current master code, you can specify a new code at any time.

If you have forgotten the code, please contact customer service.

Code upon delivery (factory default)

Master code: 1000

> **NOTE:**
>
> We recommend that you set a new master code when starting up the device for the first time in order to prevent unauthorized access to the pre-setting mode. Please make a note of the code for customer service.

Changing the code

– Press the button ⊖ for 3 seconds.
– Enter the current master code.
– Press the button ⊖ + until O—ᴛᴛ appears.
– Press the button ⏻ to select the master code.

Display:	Change the master code
O—ᴛᴛ 0000	Use the ⊕ / ⊖ buttons to select the digits. Change the current digits using 🌀 or 🔊. Once you have set up the required code, press the ⏻ button to save it. – Press and hold the ⊖ button for approx. 3 seconds to exit the 'Master code' window.

> **NOTE:**
>
> Example '1000': Press ⊖ 3 times and 🌀 once.
>
> Example '0001': Press ⊖ 0 times and 🌀 once.
>
> If the master code is entered correctly, the system will switch straight to the SETUP MANAGER menu.

2.1.3 View and change the pre-settings

Use the ⊖ / ⊕ buttons to access the previous or next function. When selecting multiple digits, the system switches between the digits.

In all cases, the selection must be confirmed with ⏻.

Use ⏻ to reset the individual operating hours (press for approx. 3 seconds until you hear the confirmation signal).
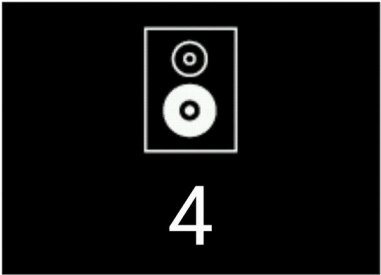

| Display:	Action:
1441	Change the values: – Use ⏻ to select the change function. – Change the current value using ⊛ or 🔊. – For multiple digits, switch between positions with ⊖ ⊕. – Use ⏻ to save the function change.
